In 2014, the world was gripped by the Ebola virus outbreak in West Africa. The epidemic killed more than 11,000 people and left a trail of devastation in its wake.

Ebola: The Untold Stories of Survivors is a gripping and inspiring account of the outbreak, told through the eyes of survivors, medical workers, and volunteers. These stories offer a unique perspective on the human toll of the epidemic and the resilience of the human spirit.

The book begins with the story of Salome Karwah, a young Liberian woman who contracted Ebola in 2014. Salome was pregnant at the time, and she gave birth to a baby boy who also tested positive for the virus. Salome and her baby both survived, but they faced stigma and discrimination from their community.

Another story in the book is that of Dr. Kent Brantly, an American doctor who contracted Ebola while working in Liberia. Dr. Brantly was evacuated to the United States, where he received treatment and eventually recovered. He has since become an advocate for Ebola survivors and for the importance of global health.

Ebola: The Untold Stories of Survivors is a powerful and moving book that sheds light on one of the most devastating epidemics in recent history. These stories are a testament to the resilience of the human spirit and the importance of hope in the face of adversity.

Praise for *Ebola: The Untold Stories of Survivors*

"A powerful and moving account of the Ebola outbreak in West Africa. These stories are a testament to the resilience of the human spirit and the importance of hope in the face of adversity." - *The New York Times*
