Once known as "Formosa," the island of Taiwan emerged from World War II with high hopes. The defeated Japanese occupiers relinquished control, and the Chinese Nationalist Party (KMT), led by Chiang Kai-shek, established its government on the island. However, the KMT's dream of a unified China was shattered by Mao Zedong's Communist forces, who triumphed in the Chinese Civil War and established the People's Republic of China on the mainland.

The retreat of the KMT to Taiwan marked a turning point in the island's history. It became a bastion of anti-Communism, supported by the United States and its allies during the Cold War. Yet, beneath the surface of this alliance, George Kerr uncovers a web of deceit and betrayal that would ultimately have profound consequences for Taiwan.

The Betrayal of Idealism

Kerr meticulously documents the high hopes and aspirations that accompanied the arrival of the KMT on Taiwan. The party promised democracy, prosperity, and a brighter future for the island's people. However, these ideals were soon trampled upon by a corrupt and authoritarian regime that suppressed dissent and stifled economic growth.

The United States, driven by its own Cold War agenda, turned a blind eye to the KMT's abuses. Kerr exposes the complicity of American officials in

propping up a regime that betrayed the very principles it claimed to represent.

George Kerr, the acclaimed historian and author who meticulously chronicled the history of Taiwan and the treacherous forces that shaped its destiny.

A Legacy of Resilience

Despite the betrayals and setbacks, the people of Taiwan have demonstrated unwavering resilience. Through decades of authoritarian rule, they have fought for their rights, preserved their culture, and built a vibrant and prosperous society.

Kerr's book pays tribute to the spirit of the Taiwanese people, their determination to overcome adversity, and their enduring aspiration for self-determination. Formosa Betrayed is not merely a historical account but a testament to the power of resilience and the human capacity for hope.
