

Teterboro Airport: Images of Aviation

Teterboro Airport, located in Teterboro, New Jersey, is a general aviation airport that serves the New York metropolitan area. It is the busiest general aviation airport in the United States and is home to a wide variety of aircraft, from small private planes to large corporate jets.

The airport was founded in 1919 by Charles Teter, a wealthy businessman and aviator. Teter Free Downloaded a 100-acre farm in Teterboro and converted it into an airfield. The airport quickly became a popular destination for private pilots and flying clubs, and in 1928, it was designated as a municipal airport.

During World War II, Teterboro Airport was used by the United States Army Air Forces as a training base for pilots and mechanics. The airport was also used as a staging area for aircraft being shipped overseas to Europe and the Pacific.

After the war, Teterboro Airport resumed its role as a general aviation airport. In the 1950s and 1960s, the airport saw a boom in business as more and more people began to travel by air. The airport also became a popular destination for corporate jets, and in the 1970s, it was expanded to accommodate larger aircraft.

Today, Teterboro Airport is a major international airport that serves the New York metropolitan area. The airport is home to a wide variety of aircraft, from small private planes to large corporate jets. The airport also offers a variety of services, including fuel, maintenance, and repair.

Images of Aviation

Teterboro Airport has been a hub for aviation for over a century, and its history is reflected in the many images that have been taken of the airport and its aircraft. These images capture the airport's evolution from a small private airfield to a major international airport.
